Offshore Surface Oil Forecast Deepwater Horizon MC252

NOAA/NOS/OR&R

Offshore

Estimate for: 1200 CDT, Thursday, 6/17/10

Date Prepared: 1900 CDT, Monday, 6/14/10

Currents were obtained from five models: NOAA Gulf of Mexico, NavO/NCOM, NRL/IASNFS, USF/WFS, and NC St./SABGOM. Each includes Loop Current dynamics. Gulf wide winds were obtained from the gridded NCEP product. The model was initialized from June 11 to June 13 satellite imagery analysis, and a June 11 CG/NOAA overflight. The leading edge may contain tarballs that are not readily observable from the imagery (hence not included in the model initialization).

this scale bar shows the meaning of the distribution terms at the current time

Next Forecast:
June 15th PM

State of Alabama Booming Update

Area Contingency Plan (ACP) Locations Booming Update

Total ACP Locations Statewide:	80

Situation Update

- Heavy sheen was observed from Perdido Pass west to Fort Morgan into Bayou St. John and Bear Point. An oily sheen was observed in Arnica Bay.
- An oily sheen was observed at the east and south sides of Galliard Island. Sheen with sporadic tar balls were observed one mile south of the Mobile Bay.
- Sheen and tar balls were observed SE of Barton Island in Grand Bay.
- Perdido Pass has been navigationally restricted according to tide by the US Coast Guard.
- On June 9, 2010, the Alabama Department of Public Health (ADPH) expanded swimming advisories due to the oiling in Perdido Pass, Mississippi Sound, and Heron Bay. ADPH is posting advisories not to swim in Bayou St. John, Terry Cove, Cotton Bayou, and Old River or in Alabama waters west of the Dauphin Island Bridge, also known as Mississippi Sound. ADPH previously had advised individuals not to swim in Alabama gulf waters or in bay waters immediately adjacent to Fort Morgan.
- All Alabama oyster beds remain closed as a precaution.
- All waters in the Gulf of Mexico including Pelican Bay and the waters of Mobile Bay east of the Mobile Ship Channel and south of a line from Mobile Ship Channel Marker Number 22 to Little Point Clear on the North side of Fort Morgan Peninsula are closed to fishing. See page # 19.
- 78,264 mi² (202,703 km²), or about 32% of the Gulf of Mexico exclusive economic zone remains closed to fishing per the National Marine Fisheries Service. See page # 20.

June 15, 2010

- Three SCAT teams were mobilized on June 14, 2010. The first team surveyed the coastal marsh of the Grand Bay National Wildlife Refuge by air boat. Two to three oily areas were observed on a small island marsh. The second team surveyed approximately four miles of Fort Morgan. Tar balls and mousse patties were observed. The third team surveyed Bon Secour Bay beginning at the west side of the mouth of Bon Secour and traveled two miles west. They observed no oil.
- Three SCAT teams will be mobilized today, June 15, 2010.
- Trajectory maps are available on-line at <http://response.restoration.noaa.gov>

Weather Forecast

- **Today**
SOUTH WINDS 5 TO 10 KNOTS BECOMING SOUTHWEST AROUND 10 KNOTS IN THE AFTERNOON. SEAS 1 FOOT. BAYS AND COASTAL WATERWAYS SMOOTH TO A LIGHT CHOP. SCATTERED SHOWERS AND THUNDERSTORMS.
Source NOAA Marine Weather 1050 AM CDT TUE JUN 15 2010
- **Tonight**
SOUTHWEST WINDS AROUND 10 KNOTS BECOMING WEST AFTER MIDNIGHT...THEN BECOMING VARIABLE 10 KNOTS OR LESS LATE. SEAS 1 TO 2 FEET. BAYS AND COASTAL WATERWAYS A LIGHT CHOP. ISOLATED SHOWERS AND THUNDERSTORMS.
Source NOAA Marine Weather 1050 AM CDT TUE JUN 15 2010
- Under light winds, sheens generally are more evident.

Skimming Operations

- There are **819** independent vessels of opportunity (VoO) assigned to work Alabama waters. Of those, a total of **736** are working in surveillance and support functions and **83** Independent VoO vessels are capable of skimming oil.
- An additional 36 vessels associated with Task Force 2, 3 & 4 are capable of skimming oil in Alabama waters.
- The total number of vessels capable of skimming oil in Alabama waters is **119**.
